

1. For each letter of the alphabet (treating the final letters as separate letters), find a form of a verb where that letter appears and is **not** one of the root letters. (For some letters this is impossible, in which case, that letter is **always** part of the root when it appears in a verb. We call such letters *reliables*.)
2. The following sign appears on an office door. Identify and explain any grammatical errors.

מְשׁוֹרֵד
בְּבִקְשָׁה לְסִגּוֹר אֶת הַדֶּלֶת
